FARMS AND FARMLAND UTILIZATION

The number of farms in New York (places selling \$1,000 or more of agricultural products in a year) totaled 38,000 in 1998, equal to a year earlier. Total land in farms remained at 7.80 million acres. Farmland accounts for 26 percent of the State's total land area.

Total cropland stands at 4.98 million acres and accounts for 64 percent of total land operated. Harvested cropland at 3.77 million acres represents 48 percent of total land

operated. Field crops such as corn, hay, haylage and greenchop, small grains, potatoes, soybeans and other field crops account for 93 percent of the total cropland harvested. Vegetable crops make up 4.1 percent and fruit crops 2.6 percent.

Estimates of farmland utilization are shown in table 1 below. The estimates are based on annual surveys with about 10,000 farms reporting each year.
